

Hamid Rizvi

Product Manager | New York, NY | New Grad May 2026 | (929) 420-6592

hamidrizvi@stern.nyu.edu | [linkedin.com/in/hamid-rizvi](https://www.linkedin.com/in/hamid-rizvi) | hamidrizvi.vercel.app | github.com/hamidrizvi4

EDUCATION

New York University

M.S. in Management of Technology | GPA: 3.7/4.0

New York, NY

Sep 2024 – May 2026

S.R.M. Institute of Science and Technology

B.Tech in Computer Science Engineering w/ Cloud Computing

Chennai, India

Sep 2020 – May 2024

EXPERIENCE

LexTrack AI (1-Click Full Stack App Builder)

New York, NY

AI/ML Product Engineering Intern

Feb 2026 – Present

- Building production RAG systems and conducting model evaluation experiments to optimize performance/cost tradeoffs, reducing LLM inference costs 40% while maintaining sub-2s latency for 95th percentile requests
- Implementing TypeScript microservices with a 3-layer fallback architecture, ensuring 99.5% uptime and preventing service disruptions for 50+ active restaurant partners
- Conducted model evaluation experiments across GPT-4, Claude, and Gemini to inform architecture decisions, establishing performance and cost benchmarks that guided the team's LLM selection for production deployment

Product Manager & Developer (Capstone Project)

Sep 2025 – Dec 2025

- Architected a highly scalable restaurant reservation template from 0→1 within a 1-click no-code platform, empowering SMB merchants to instantly generate custom applications that rival legacy platforms (SevenRooms, OpenTable) at a fraction of the cost, reducing merchant onboarding time by 80% (30min→5min), processing 80+ metadata fields across 11 categories
- Led cross-functional team of 3 engineers + 1 designer through full product lifecycle, conducting 25+ customer interviews and competitive analysis (Toast, Square, Lightspeed) to identify \$2M+ TAM opportunity in SMB restaurant tech
- Drove product adoption from 0 to 50+ active users in 8 weeks through iterative user testing, achieving 85% weekly retention and a 4.2/5 product satisfaction score based on post-launch surveys
- Built a hybrid AI architecture (deterministic rules + Google Gemini LLM), achieving 1-2s response times and 70% cost reduction through prompt engineering, caching strategy, and intelligent fallback logic

PROJECTS

QuadTax - AI Tax Compliance Engine | Founder & Lead Engineer

April 2026 – Present

- Identified and scoped a 0→1 product opportunity in TaxTech. 1.5M international students rely on costly tools like Sprintax for nonresident tax filing. Designed a hybrid AI architecture that uses LLMs for document parsing and classification while routing all tax calculations through deterministic, IRS-rule-based logic, prioritizing user trust and auditability over "AI-everywhere" design
- Shipped a full-stack web app (Next.js, FastAPI) with AI-powered document scanning (OCR + OpenAI Structured Outputs) and automated IRS form generation (1040-NR, 8843, 8833), cut filing time from ~35 min (Sprintax-style manual intake) to under 10 min in self-testing, then ran a 5-person beta to surface UX friction points and drive two major iteration cycles on the intake experience

AI-Powered E-Commerce Analytics | Personal Project

Oct 2025

- Reduced executive reporting time 95% (4hr→5min) by building an automated analytics platform processing 110K+ transactions with Python, Pandas, and Gemini API integration
- Deployed production Streamlit app serving 96K+ customer profiles with RFM segmentation, cohort retention analysis, and ML-powered churn prediction (AUC 0.82), improving retention targeting 15%

SKILLS & CAPABILITIES

Product Management & Strategy: 0→1 Product Development, Go-To-Market (GTM), User Research, PRD Writing, RICE Prioritization, A/B Testing, Cohort Analysis, Retention & Engagement Metrics, Agile/Scrum (CSPO, CSM), Figma.

AI/ML & Data Engineering: LLM Integration (OpenAI, Anthropic, Gemini), RAG Architecture, Agentic Workflows, Structured Outputs (Pydantic), Vector Databases, Model Evaluation, Cost Optimization, Pandas, SQL, ETL Pipelines, OCR (Tesseract).

Full-Stack Development: Python, TypeScript, JavaScript, Next.js, FastAPI, Node.js, RESTful APIs, CI/CD, Git/GitHub, Docker, AWS.

CERTIFICATIONS

Certified Scrum Product Owner (CSPO) | Certified Scrum Master (CSM) | Google Project Management Professional | AI for Product Management (Pendo.io)
